Internship Report Presentation

Data Science Master Virtual Internship | Siemens × EduSkills × AICTE

April 2026 – June 2026 | 8 Weeks

Candidate & Program Overview

Candidate Details

Student Name:	HARSH PATEL
Roll Number:	[2410031286
Section:	3CSE8
Degree:	B.Tech (CSE)
University:	IILM University, Greater Noida
AICTE Student ID:	STU698c933615c991770820406

Internship Profile

Program Name:	AICTE – EduSkills Virtual Internship
Domain:	Siemens Data Science Master
Duration:	April 2026 – June 2026
Weeks:	8 Weeks
Certificate ID:	41dd97631fc3c7baca42
Offer Letter Ref:	C16Y2026M081395968
Grade:	O (Outstanding)

Organization Profile: EduSkills Academy & Siemens

EduSkills Academy

An ISO 9001:2015 and ISO 20000-1:2018 certified ed-tech organization operating under the motto "Nation Building Through Skills."

AICTE Collaboration

Operates under the AICTE National Internship Portal — Ministry of Education — to scale quality internship programs for engineering students across India.

Industry Partner: Siemens

The Data Science Master program is supported by Siemens, a global leader in industrial automation and digital transformation.

Program Focus

Industry-aligned virtual internship curricula spanning AI/ML, Data Science, Cloud Computing, and Enterprise Analytics for engineering undergraduates.

Problem Statement & Industry Context

The Industry Challenge

Engineering students extensively study statistics and programming but rarely receive hands-on exposure to the full data science pipeline — from raw data ingestion and feature engineering to model deployment, monitoring, and enterprise-scale platform administration.

Production-grade data science requires additional competencies: automated data workflows, RapidMiner-based ML pipelines, and platform governance — skills largely absent from standard academic curricula.

The Solution Scope

This internship delivers a structured, 8-week progression through the complete data science lifecycle:

- Business problem identification and AI use-case scoping
- Data engineering — access, transformation, and calculation
- Machine learning — foundational to advanced techniques
- Automated data preparation and feature mastery
- Model deployment and real-world ML monitoring
- RapidMiner AI Hub configuration and enterprise platform operations

Core Project Objectives

Data Engineering & ML Foundations

Access, load, transform, and calculate data. Build foundational ML skills using industry tools and RapidMiner workflows.

Advanced ML & Data Preparation

Master advanced data handling, automation pipelines, and cutting-edge machine learning techniques for enterprise applications.

Model Deployment & Use Cases

Deploy, monitor, and evaluate ML models in production. Identify real-world business problems suited to AI and machine learning.

Platform Administration

Configure and manage the RapidMiner AI Hub. Execute enterprise-level platform operations and credential validation.

Technologies & Data Science Toolchain

Languages & Data Platforms

- Python — primary programming language
- RapidMiner Studio — visual ML workflows
- RapidMiner AI Hub — enterprise platform

Data Engineering & Preparation

- Data access, loading, and transformation
- Advanced data handling & automation
- Feature engineering pipelines

Machine Learning Techniques

- Foundational ML: classification, regression
- Advanced ML: ensembles, tuning, validation
- Model deployment and performance monitoring

Platform & Administration

- RapidMiner AI Hub configuration
- Enterprise-level platform governance
- AI/ML use-case identification & scoping

Data Science Pipeline Architecture

Business Layer	AI/ML use-case identification, problem scoping, and KPI definition for data-driven decision making.
Data Engineering Layer	Data access, loading, transformation, and calculation using Python and RapidMiner ETL workflows.
Machine Learning Layer	Model training (classification, regression, ensembles), feature engineering, and performance validation.
Deployment & Monitoring Layer	Model deployment, live inference, performance tracking, and automated retraining triggers.
Platform Administration Layer	RapidMiner AI Hub configuration, enterprise governance, credential management, and platform scaling.

Curriculum Timeline (Weeks 1 to 4)

Week 1

Applications & Use Cases | Professional

Identify business problems suited for AI and ML. Understand use-case scoping and the data science project lifecycle.

Week 2

Data Engineering | Professional

Access, load, transform, and calculate data using Python and RapidMiner ETL pipelines for real-world datasets.

Week 3

Machine Learning | Professional

Build foundational ML skills: classification, regression, model evaluation, and performance metrics interpretation.

Week 4

Data Preparation | Master

Master advanced data handling — missing values, outliers, feature engineering, and automated preparation workflows.

Curriculum Timeline (Weeks 5 to 8)

Week 5

Machine Learning | Master

Learn advanced ML techniques: ensemble methods, hyperparameter tuning, model selection, and cross-validation strategies.

Week 6

Applications & Use Cases | Master

Deploy and monitor ML models in production. Apply advanced use-case frameworks to industry datasets and business scenarios.

Week 7

Platform Administration | Master

Configure and manage the RapidMiner AI Hub — user management, resource governance, and workflow administration.

Week 8

Platform Administration | Master

Enterprise-level platform operations: scaling, security, credential validation, and Final Internship Grade Assessment.

Key Projects & Demonstrated Skills

AI/ML Use-Case Scoping

Identified and scoped real-world business problems amenable to machine learning — mapping domain requirements to appropriate ML algorithms and evaluation metrics.

End-to-End Data Engineering Pipeline

Built automated ETL workflows using Python and RapidMiner to access, transform, and prepare heterogeneous datasets for downstream ML model training.

ML Model Development & Optimization

Trained, validated, and fine-tuned machine learning models (classification and regression) with advanced techniques including ensemble methods and hyperparameter tuning.

Model Deployment & Monitoring

Deployed ML models to production environments, configured performance dashboards, and established monitoring and retraining workflows for sustained model accuracy.

RapidMiner AI Hub Administration

Configured and administered RapidMiner AI Hub for enterprise use — managing users, resources, workflows, and executing platform-level governance and compliance tasks.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Internship Title	Data Science Master Virtual Internship
Issuing Organization	EduSkills Academy (ISO 9001:2015 & ISO 20000-1:2018 Certified)
Industry Support	Siemens Industry Software
Academic Patronage	AICTE National Internship Portal & Ministry of Education
Certificate ID	41dd97631fc3c7baca42
Offer Letter Ref	C16Y2026M081395968
AICTE Student ID	STU698c933615c991770820406
Grade Achieved	O (Outstanding) — Score: 90–100

Certificate of Virtual Internship

This is to certify that

Harsh Patel

IILM University, Greater Noida

has successfully completed the 8-weeks

Data Science Master Virtual Internship

During April - June 2026

May this Internship learning propel you toward a bright and successful career.
